Cognition Ignition®

Have a Brighter Mind and Better Energy with the Formula that has Taken Hollywood by Storm: *Cognition Ignition!*

Now it's possible to enhance your life with a safe, simple-to-use, natural combination of ingredients that improves focus, alertness and mental energy while also relieving stress. Cognition Ignition is actually a brain food inspired by years of research with the world's finest herbal therapies and modern biochemistry in combination with nutritional and physiological disciplines. Its unique formula provides heightened mental alertness, lower stress levels, creates a better sense of well-being, improved memory and better sleep. Cognition Ignition is a direct-acting nutritional tonic that restores your natural ability to feel good and operate at peak levels even in these very stressful times. Its benefits can be felt within one hour, and with continual use, benefits accrue.

David Litell, the founder of Cognition Ignition, recognized that without good health you really can't enjoy your life. Along with a global network of nutritional and spiritual experts, he has developed a formula of catalytic raw materials including vitamins, minerals, amino acids, normal biological intermediates and trace minerals. When combined, these natural ingredients initiate the production of neurotransmitters and stimulate a sense of natural well-being through enhanced ATP production (serotonin),

improved oxygenation, better circulation and increased energy production. With these restorative properties, Cognition Ignition has become a favorite with Hollywood celebrities and other professionals who find it an essential nutritional aid for optimum performance. In fact, Cognition Ignition is now included as part of the prestigious gift bag insertions that are distributed during the *Oscars* and *Grammy* awards presentations. Always able to spot an important trend first, celebrities have recognized Cognition Ignition's proprietary formula as a "mind food" that can promote your body's natural ability to feel good, without any adverse side effects.

At Cognition Ignition we like to use the phrase "Ita Daki Mas," a Japanese saying that means our health and well-being is blessed by all that is available to us, through all people, minerals, plants and animals who have a role in bringing good things to us. We hold all of this in reverent gratitude, and that is the essence that we have put into Cognition Ignition. It is our way of offering these things to you too. Those who fly American Airlines will also hear a radio interview with David Litell about this most unique must have product that can be ordered simply by going to:
